6. A very thin fan motor with heat sink attached as described in claim 3, in which there is a heat plate formed of a material with excellent thermal conductivity, such as a precious metal or copper, or a material that is partially diamond crystal, and the heat sink assembled on the heat plate is a stack of metal heat radiation fins made of copper or aluminum.--

**REMARKS**

By the above amendment, claim 4 has been rewritten and claims 5 and 6 have been added to correct the improper multiple dependency of original claim 4. No new matter has been added. In view of the foregoing amendments, Applicants respectfully request examination of the instant application.

The Commissioner is hereby authorized to charge any deficiencies in fees or to credit any overpayments to counsel's Deposit Account 19-2380.

Respectfully submitted,

  
Eric J. Robinson
